Weather Update (National Weather Service)

Impacts

- Rain will continue Wednesday Night across northern and central California, focusing more on central California and the Bay Area Wednesday night
- A series of storms will bring periods of gusty winds, and above normal precipitation to much of northern and central California into early next week, with some burn scar impacts possible from Thursday through early next week as the heaviest precipitation arrives.
 - Burn scar areas of concern for Thursday night into Friday include Dixie, Sheep, Walker, and Beckworth.

Watches/Warnings/Advisories

Northern California

- **Flash Flood Watch** in effect late Thursday night through Friday morning for portions of Shasta, Lassen, Plumas and Sierra Counties, the Sacramento Valley, and the Northeast Foothills.
- **Wind Advisory** for central Siskiyou and Modoc Counties through the first half of Wednesday, and again Wednesday night through early Friday morning.

Southern California

- None

Forecast

Northern California	
<u>Valley (Wed Night-Thu)</u>	<u>Foothills/Mountains (Wed Night-Thu)</u>
Temps: Highs: 60-80°F, warmest in the San Joaquin Valley; Lows: 42-55°F	Temps: Highs: 50-65°F, with 40s for the highest elevations; Lows: 24-48°F
Humidity: Day: 65-100%, except 25-40% for the San Joaquin Valley; Night: 70-100%	Humidity: Day: 50-85%, except 10-20% across the southern Sierras; Night: 30-45% for the southern Sierras and southern foothills, otherwise 70-100%
Winds: Light winds overnight becoming south to southwest 10-15 mph, gusting to 25 mph in the Bay Area and Sacramento Valley Thursday. Light winds under 10 mph will continue for the San Joaquin Valley Thursday.	Winds: South to southwest 10-20 mph increasing to 15-30 mph over the higher elevations late Wednesday and continuing Thursday. Some gusts of 40-55 mph over the higher ridges late overnight and Thursday.
Precipitation: Periods of rain. 0.25"-1.5" rain accumulation, with localized amounts up to 2" possible.	Precipitation: Periods of valley rain and mountain snow. Snow level 5000 feet. Precipitation amounts of 0.25 - 1.5" expected.
Southern California	
<u>Coast (Wed Night-Thu)</u>	<u>Inland (Wed Night-Thu)</u>
Temps: Highs: 65-75°F; Lows: 40-53°F, with 30s in the mountains	Temps: Highs: 75-85°F, with 60s in the higher elevations; Lows: 45-55°F, with 30s for the higher elevations
Humidity: Day: 40-60%, except 15-30% for the mountains; Night: 90-100%, except 35-50% in the mountains	Humidity: Day: 13-20%; Night: 25-50%
Winds: Light offshore around 5 mph overnight becoming onshore 10-15 mph Thursday	Winds: Light and variable 5-10 mph
Precipitation: Dry	Precipitation: Dry

Report Time:

1630

Outlook for Friday through Wednesday:

- The next weather system brings heavier precipitation to northern California Thursday night into Friday, and then a third event arriving Sunday into Monday looks to bring the most significant amounts of rain and mountain snow to northern and central California, with moisture also reaching southern California. Heavy precipitation may trigger localized flooding over burn scar areas by late in the week, with Sunday into Monday the most likely time frame for potential rain impacts. Unsettled conditions continue into mid week for much of the state.
